3 Operation & Maintenance

# The Capability to Solve Complex Challenges

With the world's most comprehensive family of water and fluid technology brands, Xylem has a broad off-the-shelf product offering to meet your everyday application needs. Sometimes, however, harsh conditions and operational challenges require a unique solution, which is why Xylem Service Solutions designs and manufactures custom equipment that works efficiently and reliably in even the most demanding environments.

Whether you require a custom component or a large-scale, complex assembly, Xylem design and application engineers provide hands-on consulting and project support throughout our flexible manufacturing process. Backed by a North American network of advanced fabrication facilities, we offer the technical expertise and capabilities to meet your exact specifications. We have the ability to respond quickly in the case of an emergency, and for projects that require on-site support, our technicians drive service vehicles equipped with generators and field fabrication tools.

## **Key benefits:**

- Deep design and application engineering expertise
- Access to Xylem's North American network of advanced fabrication facilities
- 24/7/365 field support

# Our Custom Capabilities

## Equipment Assembly Components

- Column Pipes
- Custom Fittings
- Discharge Manifolds
- Suction Bells
- Turbine Risers
- Vertical Pump Discharge Heads

## Installation Components

- Critically Silenced Enclosures
- Custom Heavy-Duty Skids
- Floating Barges
- Fuel Tanks on Skid Bases
- Mixer Stands
- Skids
- Submersible Pump Surface Plates
- Various Styles of Base Plates

## Drivers & Drive Components

- Diesel, Natural Gas, Liquid Propane Engines
- Drive Shafts
- Electric Motors
- Gear Boxes

## Controllers

- PLCs
- Soft Start Controllers
- Variable Frequency Drives (VFDs)

## Ancillary Items

- Paint
- Manifolds
- Filter Pots
- Road Ramps

Diesel-driven fire protection pumping package featuring split-case pump-end with priming system, custom suction and discharge manifolds with pressure gauges.

Custom turbine pump riser – designed, built, delivered and installed in one week.

Diesel-driven portable pump set with integral manifold, pressure regulating valves and recirculation lines to adapt to nearly any operating condition.

## Xylem Service Solutions

As the world's most trusted water and wastewater experts, we provide the full range of technical and field support needed to achieve greater efficiency, reliability, and compliance. From designing smarter next-generation systems to 24/7 turnkey operation, it's our job to help you solve water and fluid challenges.

---

### What Sets Us Apart

#### Unrivaled water and fluid expertise

Anybody can sell a piece of equipment, but only Xylem Service Solutions brings deep, trusted know-how to every job – driving greater performance across your entire operation.

#### Comprehensive, integrated portfolio of services

When it comes to mission-critical applications, we provide an integrated blend of both standard and advanced support – everything you need to minimize risk, maximize uptime and control lifetime costs.

#### Flexible, scalable, and responsive

Because your needs and budgets are constantly changing, we can engineer a tailored service solution for any size project that delivers the most value year after year.
